📄 PROFESSIONAL SUMMARY

Data Engineer with 4+ years of experience building ETL/ELT pipelines, Data Warehouses, and large-scale data migration projects for US and Canadian public sector clients, including an on-site engagement in Canada. Hands-on experience with Azure Databricks, Azure Data Factory, PySpark, T-SQL, and Oracle PL/SQL, including 800GB+ pension data migration with 100+ tables. Developed a reusable data-processing framework now used across five client projects. Extended to lakehouse architecture, hands-on practice with Delta Lake, ADLS Gen2, Synapse and Microsoft Fabric. Microsoft Azure DP-900 and AZ-900 certified.

🧠 SKILLS

Programming

Python, PySpark, SQL (T-SQL, PL/SQL), C#, Shell Scripting, PHP

Data Engineering

ETL/ELT pipeline design, medallion architecture (Bronze/Silver/Gold), Delta Lake, batch & incremental processing, data migration, data modeling, data warehouse & data mart design, SSIS

DevOps & Tools

Azure DevOps, CI/CD pipelines, Git, Docker, build & release management

Azure & Cloud

Azure Databricks, Azure Data Factory (ADF), Azure Data Lake Storage Gen2 (ADLS Gen2), Azure Blob Storage, Azure SQL Database, Azure Synapse Analytics, Microsoft Fabric / OneLake, Azure DevOps

Databases

Microsoft SQL Server, Oracle PL/SQL, Azure SQL Database, stored procedures, query optimization, performance tuning

BI & Reporting

Power BI, SSRS, data mart development

📁 PROFESSIONAL EXPERIENCE

Engineer - Data (Azure Data Engineering Function) | Sagitec Solutions

Sagitec Solutions develops pension, benefits and unemployment insurance systems for public-sector clients throughout the U.S. and Canada. Lead data engineer on 5 client projects involving pipeline development, data migration and Azure cloud integration.

Key Client Projects

Prudent Benefits Administration Services (PBAS) & AI R&D

04/2026 – Present | Chennai

- Working on legacy data conversion, pension prior-service processing, and prior-service screen development.
- Contributing to an AI R&D initiative that uses legacy data-mapping documents and data-modelling artefacts to speed up U.S. and Canadian pension workflow development.
- Writing Python automation scripts and AI-assisted data pipelines to cut manual engineering effort and shorten delivery timelines.

Alaska Division of Retirement and Benefits (ASKDRB)

01/2025 – 03/2026 | Canada

- Worked on-site in Canada, engaging directly with client stakeholders to turn business logic into scalable data conversion rules for a data migration project.
- Wrote and tuned PySpark scripts in Azure Databricks to transform and load pension datasets, keeping data integrity across 100+ tables.
- Built manual SQL data pipelines and on-prem SQL Server routines to keep multi-environment refresh cycles in sync.
- Worked with technical architects to resolve data discrepancies, tune SQL jobs, and keep pipelines stable across an 800 GB+ dataset.
- Designed batch workflows integrating Azure Databricks with on-prem SQL Server, using incremental loads to cut processing time.

Utah Retirement Systems (URS)

06/2024 – 01/2025 | Chennai

- Built ELT processes and dimensional data models for the data warehouse, validating data flow from multiple source systems into the target schema.
- Designed SSIS packages for delta loads and snapshot captures supporting historical tracking and audit requirements.
- Optimised T-SQL stored procedures feeding data marts, reducing execution time for downstream BI reports.
- Built SSRS reports surfacing pension data metrics and pipeline health KPIs for business stakeholders.

Prudent Benefits Administration Services (PBAS)

11/2022 – 01/2024 | Chennai

- Built a hybrid sync pipeline in Azure Data Factory and SQL to keep a legacy system and a newly deployed cloud app aligned.
- Designed ADF pipelines to orchestrate SQL execution and trigger Power BI refreshes, giving stakeholders real-time visibility into conversion progress.
- Built a 'Process Hold Back' module in C# for complex file-upload logic, improving data ingestion reliability.
- Reviewed conversion reports with QA to flag anomalies and certify completeness of migrated datasets.

Healthcare Employees' Pension & Benefits Plans (HEB)

05/2022 – 06/2024

- Wrote Oracle PL/SQL scripts to validate business rules and generic tables across hundreds of tables ahead of cutover.
- Produced validation reports for client review and ran multi-region data migration with zero critical data loss.
- Wrote PL/SQL data-fix scripts to remediate issues found during migration rehearsals while preserving referential integrity.
- Managed CI/CD build and deployment pipelines in Azure DevOps for database script releases across regions.

Cross-Project Technical Contributions

- Designed and maintained a reusable data-processing framework standardising logging, error handling, and debugging across 5 client projects (PBAS, HEB, ASKDRB, TCRS, MainePRS); documented it and mentored junior developers.
- Tuned PL/SQL and T-SQL stored procedures, functions, and views for data volumes up to 800 GB, cutting execution time on critical reports.
- Automated SQL script and SSIS package deployment across Dev/QA/Prod through Azure DevOps pipelines, reducing release risk.

- Led design of batch and incremental pipelines integrating on-prem SQL Server with ADF, Databricks, and Blob Storage.

Software Developer Intern | Selfmade Ninja Academy

12/2020 – 08/2021 | Bangalore

- Built components of a Virtual Lab platform in PHP, Python, and MongoDB; containerised services with Docker for consistent deployment.
- Worked across the full SDLC — requirements, development, code review, testing, and documentation

EDUCATION AND QUALIFICATIONS

Master of Computer Application (MCA)

08/2019 – 09/2021 | Chennai

Sri Muthukumaran Institute of Technology, Chennai.

B.Sc. computer science, Sindhi college of arts and science, Chennai.

07/2016 – 05/2019 | Chennai

CERTIFICATES

- **Microsoft Azure Data Fundamentals (DP-900)** — Issuer Microsoft
- **Microsoft Azure Fundamentals (AZ-900)** — Issuer Microsoft
- **Agentic AI for Software Development (Claude Code in Action)** — Issuer Anthropic/Claude
- **Power BI Essential Training** — National Association of State Boards of Accountancy (NASBA)

ACHIEVEMENTS

Star Performance Award

09/23/2023

Received the Star Performance Award on October 23, 2023, for exceptional contributions in managing simultaneous roles within the PBAS application. Successfully led the data conversion and sync-up process while providing valuable assistance to the testing team, showcasing strong multitasking abilities and dedication to achieving project goals.
